Youth is the backbone of the family, society and the entire nation. Childhood is helpless, inexperienced and thoughtless. So it can be seized with greed or threat but this idea does not work for the young man. Because young people have logic, His intellect is capable, it is now the fun of thought has burst. He has come to know the mathematics of profit and loss very well.

Moreover, Glorious past is a testimony to the fact that youth and youth have surpassed what they assumed to be their masculinity. Thanganat of such a hopeful youth can still be heard on the world stage, If we open the pages of history, we will know that

**Swami Vivekananda** was only **33** years old when they hit the banner of Sanatan Dharma in Chicago . At the young age of **33**, he set up four benches in four directions.

**Blaise Pascal** wrote a book on geometry at the age of 16, and at the age of **19** he gave the world the adding machine.

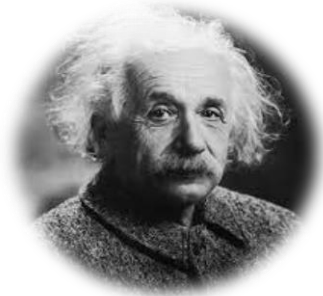

**Saint Gyaneshwar** composed the Gyaneshwari Gita at the age of only 16 years.

**Alexander** the Great, was a king of the ancient Greek kingdom of Macedon. He was only **27** years old when he conquered half the world.

**Albert Einstein** was a German-born theoretical physicist, widely acknowledged to be one of the greatest and most influential physicists of all time. Einstein established the theory of relativity at the age of **27** And at the age of **36** he got the Nobel Prize.

**James Watt** gave the world the gift of a steam engine when he was just **33** years old

The two brothers named **Right Brothers** were only **32** and **36** years old when they dropped the man into the sky, discovered the plane.

**William Pitt** became Britain's youngest prime minister at the tender age of **24**.

Our Father of the Nation **Mohandas Karamchand Gandhi** was only **27** years old when he started ringing the death Bell of the British Empire in Africa through Satyagraha.

These are the great personalities, who have accomplished what they set out to do, When the bond of time, place and circumstance separates man, he is bound by a fence of limits. And so he can't think of anything beyond these limits. But, those who think beyond the perilous time-place-circumstances and those thoughts have been inspiring for the masses for ages and have been written beyond. These are the individuals who could not stop the bondage of time, place and circumstances from working. The clang of his courage and readiness will resonate in the new continent forever.

Today the world is emerging from youth, The whole society is also equipped to shape the youth to mold them but The loss seems to be methodological. Mother Teresa's said that "The biggest disease today is not leprosy or TB but rather the feeling of being unwanted" . Today's youth need to be awakened from within, encouraged and best valued for their intellectual property. The Bhagirathi work started by the Gujarat Technological University is a revolving school which is the release of a new method of youthfulness. Which will be helpful to anyone concerned for the youth.

Abraham Lincoln was an American lawyer and statesman who served as the 16th president of the United States from 1861 until his assassination in 1865. Lincoln led the nation through the American Civil War and succeeded in preserving the Union, abolishing slavery, bolstering the federal government, and modernizing the U.S. economy. Lincoln always said that "Difficulties are gems to me. I Embrace Difficulties". It is in difficulties that the inner power of man comes out. Whether it is a political, social or spiritual area who which has welcomed the obstacles. They have climbed the same ladder of success.

Through GTU - IP Facilitation Centre, the youth can use the power within themselves to be first self-useful then useful to society and then useful to the nation.

**"Life is not about Earning or Yearning, But more about Learning."**
